DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Herbreteau et al.

In regard to claims 1-3 and 7, the Herbreteau et al. reference discloses “equipment for treating” containers, comprising a “treatment site” (Figure 2) being fed a container 6 for purposes of treatment and being fitted with a “treatment implement” 12 acting from above on the mouth 5 of the container 6, further comprising slot nozzles (27, 28, 29) which are configured laterally of the treatment site and which blow off a clean gas and are arrayed in a manner to generate a gas curtain protecting the mouth 5 of the container 6, wherein the slot nozzles (27, 28, 29) are configured in substantially mutually opposite air jet directions in such manner that a rammed flow is generated between the slot nozzles (27, 28, 29) comprising, relative to the plane of symmetry (S), upward and downward flow components that issue from the region of the slot nozzles (27, 28, 29), the mouths 5 of the containers 6 in the treatment position being configured in one of the flow components, the slot nozzles (27, 28, 29) being configured to communicate at least upward or downward with the free atmosphere.

Allowable Subject Matter

Claims 4-6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art pertains to various container cleaning systems, similar to Applicant's device.
